

**MAKING LIFE IN THE CLASSROOM
EASIER AND MORE FULFILLING WITH
STREAMLINED, COST-EFFECTIVE
TECHNOLOGY**

WHAT LINKS IS

- LINKS is the world's **first Comprehensive Education System** (CES) — a unified, streamlined, easy-to-navigate SaaS platform built for teachers, students, administrators, parents, school staff and community for K-12, Higher Education, and Global institutions.
- LINKS puts the power and possibilities for students' learning experience in the hands of the people who need it the most: students and teachers.
- No more need to access or manage multiple and separate student information systems for curriculum mapping software, learning management systems, assessment software, and more. LINKS brings these together in one elegant portal that's easy to navigate and manage. Even better, it's easy to afford at an all-in-one cost

SEVEN INTERFACES

STUDENT

INSTRUCTOR

ADMINISTRATOR

PARENT

SCHOOL STAFF

STUDENT SERVICES

COMMUNITY

CORE VALUE

Our secure, cloud-based, connected system gives teachers their time back in the classroom, helps students have fun with their learning, and reach 100% proficient and connects all adults who work for the school or do not work for the school connected around the students needs in one place.

CORE DIFFERENTIATORS

- One unified platform** replacing SIS + LMS + Communication tools
- One price** for all features and upgrades (no upsells, no hidden fees)
- Easy to use** UX designed for all ages and languages
- Safe and secure** AI-powered tools for students, instructors, and administrators
- Global multilingual and multi-campus support
- Faster** deployment, reporting, and data analysis
- Connects all** people working with our children

ADVANTAGE FOR ADMINISTRATION

- LINKS gives administrators full transparency into student performance, teacher effectiveness through assessment data, and compliance reporting. With LINKS comprehensive educational system, every system a district currently licenses are replaced by one low-cost platform: SIS, LMS, curriculum, food ordering, HR, custodial, fire, and transportation.
- The built-in administrative assistant eliminates the need for outside consultants by handling programming schedules, compliance records, PD plans, and strategic planning. State officials, board members, and the public can log in directly to access real-time reports and transparency requests — without placing any additional burden on district staff.
- The flexibility of LINKS allows school districts to switch between different compliance requirements with the press of a button. Including changing curriculum formats from IB to UBD; from traditional grading to standards based grading; from Industry standards to state standards in CTE programs; allowing schools to meet multiple credentials without doing double or triple work.

COMPLIANT:
HIPAA
FERPA
COPPA

Our secure, cloud-based, connected system gives teachers their time back in the classroom, eliminates data-bleed with our unified platform, keeps all relevant data secure from end-to-end, and connects staff and students in one place.

School districts, administrators, teachers and staff may have to visit 10+ different portals or software programs during their daily schedule. This can be confusing and costly. LINKS clears up the confusion and houses everything in one color-coordinated and streamlined space to save time and money by getting rid of data bleed and lag time from switching between platforms.

STREAMLINED

LINKS focuses on the student experience. No two course schedules are alike, and the systems that track them should be built with that in mind. From attendance to extracurricular events and curriculum planning — LINKS' easy-to-navigate portal keeps everything & everyone organized in real time with child-safe AI assistance using strict guardrails to control its scope of operation.

STUDENT-CENTERED

LINKS is a secure, cloud-based, end-to-end encrypted and connected system that accommodates and gives real-time access to seven interfaces that organize students' schedules, activities, and education experiences so students and school communities have a more streamlined, cost-effective, efficient, and secure experience.
